# 4. WHY MEDLINK STUDENTS?

## How it All Began?

Every year, thousands of applicants do not receive offers to study medicine or dentistry in their home country. One of those applicants was Sam, the founder of Medlink Students.

Despite not being given the chance to study in the UK, he did not give up on his dream of becoming a doctor. Instead, he looked at Europe, scored a place at Craiova Medical University, and graduated as an MD.

Seeing how his peers struggled inspired him to set up an organization to facilitate the way to medicine for future doctors. Only a few years later, the company has grown to become one of the top international student recruitment agencies.

Don't just take our word for it. Here's what students say:

"Medlink Students is an amazing agency, all their agents are medical students and they will do everything in their power to help you get into the med school of your choice. They are very caring that they will actually look after you even after getting you in. Every time I had a question, I would get a reply from them right away. Even after I arrived in Bucharest they had a [student] waiting for me who helped me register at university."

**Lana Khaled**  
Carol Davila University Of Medicine & Pharmacy in Bucharest

"Well where do I start... Students who go through Medlink Students must realise that a miracle is about to happen in their life journey. I was so confused and stressed about not making it to medicine until I came across the Medlink Students. Their team assured me that I should not worry about making my dream come to reality. The communication was excellent. You can literally get your questions answered 24/7."

**Azad Sayak**  
Medical University in Romania

"The most professional agency. Great value for money with round the clock personal communication which made life so much easier for me. I've tried in the past without the agency and I wasn't able to apply because it was so daunting. They will be able to find you a university whatever your circumstances and preferences. They have agents in every university (and two in mine) who are very friendly and who I can go to for help for the whole 6 years regarding settling in to the university and the city."
